

## Doctor Appointment & Consultation System (Healthcare CRM)

To automate core healthcare CRM processes such as appointment scheduling, prescription approvals, and patient notifications using Salesforce declarative automation tools (Flow Builder, Validation Rules, and Approval Processes). This phase enhances productivity, accuracy, and communication within the clinic system.

### 4.2.1 Validation Rules

## Flow 2 – Doctor Email Notification on New Appointment

- **Object:** Appointment
- **Trigger:** Record is created
- **Action:** Send Email to Doctor (\$Record.Doctor\_\_r.Email) using Flow's Send Email (Beta) action.
- **Email Subject:** "New Appointment Scheduled for {!\$Record.Patient\_\_r.Name}"
- **Email Body:**

Hello Doctor,

A new appointment has been scheduled.

Patient: {!\$Record.Patient\_\_r.Name}

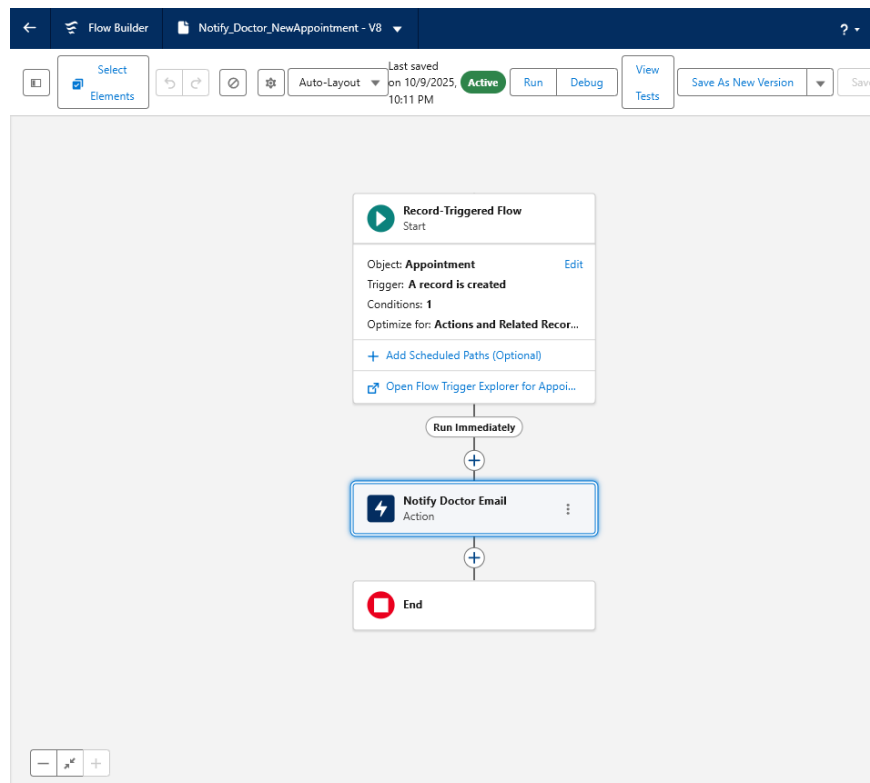

Appointment Date: {!\$Record.Appointment\_Date\_\_c}

Consultation Type: {!\$Record.Consultation\_Type\_\_c}

Regards,

Clinic Admin

- **Purpose:** Automatically informs the doctor whenever a patient books an appointment.

### 4.2.3 Approval Process for Prescriptions

**Scenario:** If a prescription is critical or the prescribed amount exceeds ₹ 5000, admin approval is required.

| Step                    | Configuration                                                                    |
|-------------------------|----------------------------------------------------------------------------------|
| Entry Criteria          | `Amount__c > 5000                                                                |
| Initial Submitter       | Doctor (Record Owner)                                                            |
| Approver                | System Administrator                                                             |
| Initial Actions         | Set Approval_Status__c = "Pending"                                               |
| Final Approval Actions  | Set Approval_Status__c = "Approved" and trigger email alert to doctor            |
| Final Rejection Actions | Set Approval_Status__c = "Rejected" and trigger rejection email alert (optional) |
| Record Locking          | Enabled while Pending (optional)                                                 |

**Purpose:** Implements a formal review and authorization workflow for high-value or critical prescriptions.
